

Post-Visit Activities

LEVEL TWO:

- Design a poster by either drawing it, using a computer or by making a collage, so that people understand why it is important to save the rain forests.
- Draw a picture of a rain forest showing the different layers within the rain forest and then draw what lives at each layer and label them.
- List why conservation of these rain forests is important. What can you do to help? E.g. Raise funds for a charity to prevent de-forestation, start a campaign to make sure that all paper is recycled at school etc.
